Timeless Medical Systems Releases Version 2.0 of the Timeless Cancer Registry System

April 11, 2005, NCRA Annual Conference, New Orleans, LA – Timeless Medical Systems today announced the release of the Timeless Cancer Registry System (CRS) version 2.0.

The Timeless CRS is a complete statistical information gathering, management and analysis system for Cancer and Tumor Registrars. The Timeless CRS is an advanced system built using the latest database foundation and security technologies. The product supports current industry dataset and reporting standards including NAACCR, ICD-0 and ICD-9 topography/morphology codes, TNM and collaborative staging, and can form an integral part of a registrar's HIPAA compliant workflow. The Timeless CRS provides registrars with an intuitive and efficient workflow and a fast reporting engine enabling the highest possible quality of data. The Timeless CRS can automatically connect with centralized reporting agencies using secure Electronic Data Interchange (EDI), and is designed to operate on multiple database back-ends and operating systems including Windows, Netware and UNIX.

"Timeless is very pleased to announce the release of version 2.0 of our Cancer Registry System," stated Justin MacLeod, President of Timeless Medical Systems. "This latest release of the Timeless CRS incorporates significant new feature sets into our product including TNM and collaborative staging, multiple database platform and OS support, as well as, many optional *Snap-In* modules which are completely plug and play. With version 2.0, the Timeless CRS offers Cancer and Tumor Registrars a highly adaptable, cost effective and completely platform independent solution."

Version 2.0 of the Timeless CRS is available for implementation now. Interested parties may find contact information below.

About Timeless Medical Systems

Timeless Medical Systems develops advanced software applications, hardware and information technology systems for Healthcare Professionals. Timeless Medical Systems' products include statistical information gathering, reporting and management applications for Cancer Registrars and Oncology Departments, blood product inventory management and tracking systems for Blood Labs/Banks, laboratory information management systems (LIS/LIMS), 9-1-1 communications systems, clinical speech diagnostic tools, as well as, sophisticated database management tools for health records security, back-up and data integrity.
