Timeless Medical Systems Releases Version 2.0 of the Timeless Laboratory Information Management System (LIMS)

April 22, 2005, Joint Conference of the CSTM, CBS and Héma-Québec, Banff, Alberta – Timeless Medical Systems today announced the release of the Timeless Laboratory Information Management System (LIMS) version 2.0.

The Timeless LIMS is a comprehensive laboratory information management system for all laboratory disciplines. The Timeless LIMS is an advanced system built using the latest scalable database foundation, incorporates customizable applications, supports multiple users in more than one geographic area with secure access to the data, and provides an intuitive and efficient workflow enabling fast and accurate turn around of results. The Timeless LIMS provides hospital and reference laboratories, as well as, regional and state/provincial health services providers with a complete end to end solution.

“Timeless is very pleased to announce the release of version 2.0 of our Laboratory Information Management System,” stated Justin MacLeod, President of Timeless Medical Systems. “This latest release of the Timeless LIMS incorporates significant new feature sets into our product including fully customizable application screens and forms, secure web enabled access to the central database and support for multiple laboratory departments, both internal/external and across multiple platforms. With version 2.0, the Timeless LIMS meets the mission critical objective of fast and accurate turn around enabling the highest possible quality results.”

Version 2.0 of the Timeless LIMS is available for implementation now. Interested parties may find contact information below.
